

REMARKS

The amendments to the Specification and Claims above are to correct typographical errors and to add clarity and consistency to the text of the specification and claims before the issuance of the Letters Patent. Applicant respectfully asserts that no new matter has been added.

For example, "power device transistor" and "amplifier" (as used in Claim 22) are amended to the more technically correct "power transistor device." Also, "PMW Amp" is amended to the more technically correct "comparator."

In Claim 16, the text "and a third output" is deleted to remove a redundancy, as the same output is recited three lines later in that claim.

FIG. 2 is amended so the identification of #115 properly matches the written description.

Applicant does not believe that any fees are due; however, in the event that any fees are due, the Commissioner is hereby authorized to charge any required fees due (other than issue fees), and to credit any overpayment made, in connection with the filing of this paper to Deposit Account 50-2180 of Storm LLP.

Should the Examiner require any further clarification to place this Application in condition for allowance, the Examiner is invited to telephone the undersigned at the number listed below:

Respectfully submitted,
